Report- Science Club Activities 2022-2023

Report- Science Club Activities 2022-2023

OBJECTIVES

- To provide opportunity to the student to try new things
- To develop among students the spirit and attitude of healthy competition for the individual and social cause.
- To boost student's self-confidence.

Action Plan

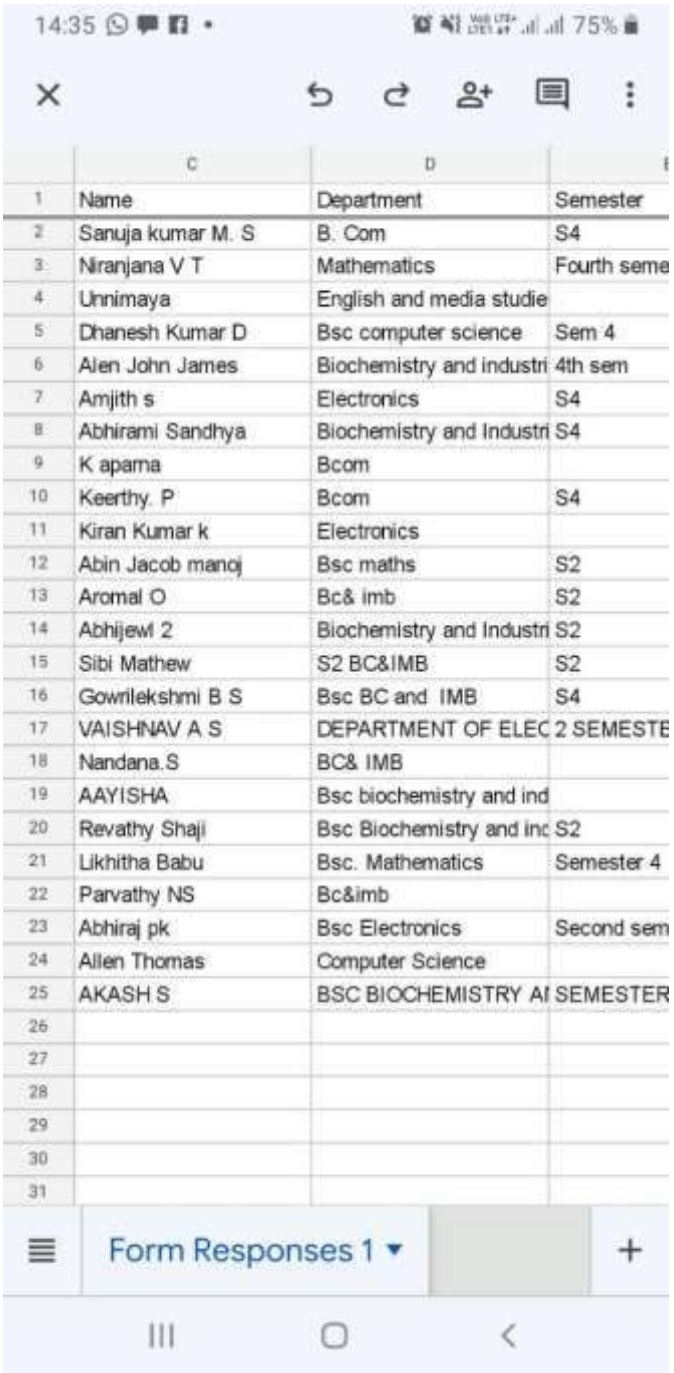

- To conduct Seminars, Exhibition.
- To conduct Quiz competition
- To celebrate Science Day & other important days related to science.

Science Club Activities

- **A talk on "Zoonotic Diseases as Emerging Infectious Diseases - The Story So Far"**

The Science Club ,College Union and BC &IMB department jointly organised a Zoonosis day as part of science club activities via online mode using Google Meet. The event aimed to raise awareness about zoonotic diseases as emerging infectious diseases. Mr. Manuel Thomas,Research Consultant, Unibiosys Biotech Research Labs,Cochin was the resource person for the event, and the topic of the talk was "Zoonotic Diseases as Emerging Infectious Diseases - The Story So Far on 6th July 2022 at 7.00 pm."The talk was attended by a total of 35 students. He provided a detailed overview of zoonotic diseases, their impact on global health, and the importance of understanding and preventing them. He also encouraged active participation from the students, answering their questions and clarifying any doubts they had. The event helped raise awareness about the importance of understanding and preventing zoonotic diseases, which is critical in today's world.

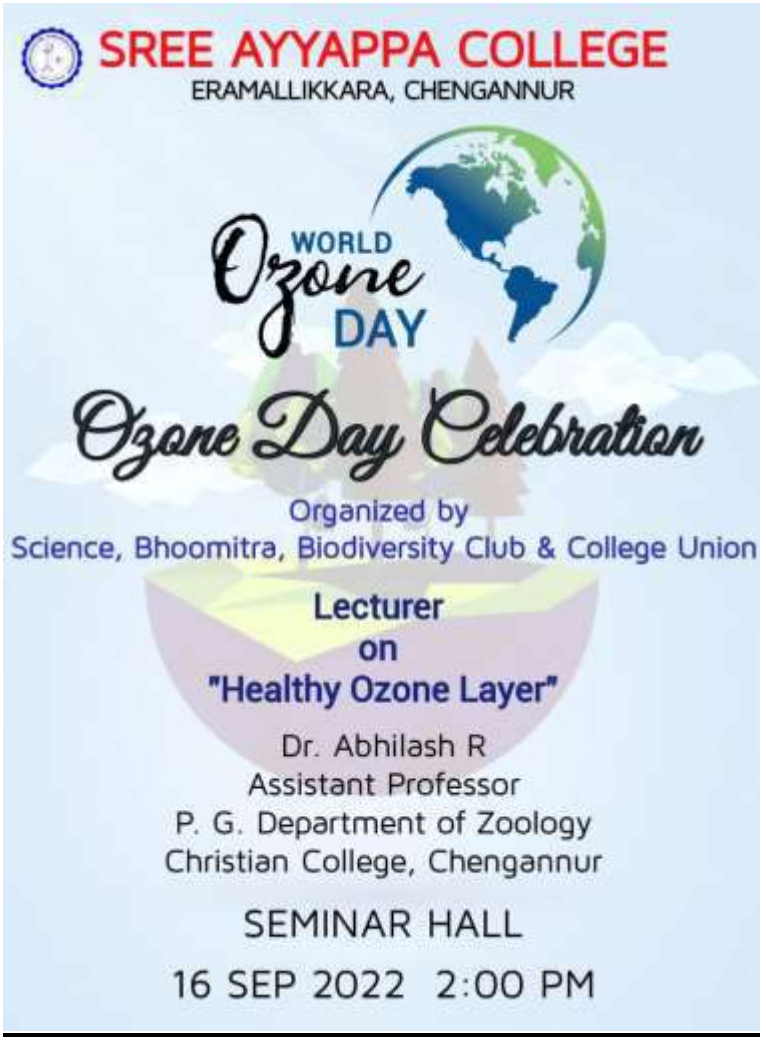

- **World Ozone day Celebrations - Day 1**

A joint event was organised by the Science Club, Bhoomithra, and College Union on the occasion of Ozone Day celebrations. The event included a lecture on the importance of a healthy ozone layer, delivered by Dr.Abhilash R, Assistant Professor, PG Department of Zoology, Christian College,Chengannur, on 16th September 2022, at 2.00 pm, in the College seminar hall.

The lecture aimed to raise awareness about the significance of the ozone layer and its role in protecting life on earth. He highlighted the harmful effects of ultraviolet radiation from the sun and the depletion of the ozone layer on human health, agriculture, and the ecosystem.

He discussed various measures that can be taken to reduce the use of ozone-depleting substances, such as CFCs and HCFCs. He also stressed the need for promoting sustainable practices to mitigate the impact of human activities on the environment.

Following the lecture, an essay competition was organised for the students in the college library. The competition aimed to encourage students to express their thoughts and ideas on the importance of preserving the ozone layer and the role of individuals in achieving this goal. The event saw enthusiastic participation from the students, who demonstrated their awareness and concern about environmental issues.

- **OZONE DAY CELEBRATION - WEBINAR AND PANEL DISCUSSIONS**

On September 17, 2002, at 7 p.m., a webinar was held on Google Meet with the topic "Social Entrepreneurship in Ozone Layer Protection Way Forwarding the Era of Disaster." The seminar was then guided by a rising research scholar in the field of climate change, who kept things interesting by challenging the students to think critically. After 30 minutes, the programme moved to a panel discussion. Over sixty people participated in total, including those working for international organisations in Dubai and NGO were joined as participants. The workshop was enlightened by the gracious presence of Dr. Sharma from the Climate Change Department at Central University. The moments were accentuated by the gracious presence and sincere participation of IQAC Convener Dr. Suresh S, NSS Program Officer Ms. Lavanya M, Biodiversity Coordinator Dr. Nitha B, Science Club Coordinators Sreelakshmi Warrier.C CLMC Convener Dr. Vidhya N. Dr.Ganga.G,Convener Bhoomithara club convened the program and coordinated the session. The joint venture program of Various clubs of our college and the Go green Organisation was very fruitful and session. A new add on Course on" Environmentally sustainable Economics" was discussed during the session Sree Ayyappa College students were educated by discussing their qualms about ozone depletion and climate change. Ms. Abhirami Sandhya BSc. and the IMB department welcomed the session. Ms Amina from BC and IMB offered a vote of gratitude to conclude the meeting. Participants in the activities included NSS volunteers, BMC volunteers, members of the Science club, and members of the College Union. Researchers from a number of institutions took part in the session.

Notice.

In connection with ozone day Sree Ayyappa College is organising a webinar on "Social Entrepreneurship and Conservation in Ozone layer protection - Way forwarding the Era of disaster" by Mr. Jayaraj.P. Programme coordinator Krishi Vigyan Kendra, Kannur. All are requested to participate for the same. This will be joint venture of science club, BRC, NSS and biodiversity club on 17/9/2022 at 7 pm on google meet.

- **World Heart Day Celebration**

On the occasion of World Heart Day, the Department of Physical Education, Science Club, and Department of Biochemistry jointly organised a lecture to raise awareness about cardiovascular health.Dr. N Madhavan, Assistant Professor, Department of Physical Education,Sree Ayyappa College was the speaker of the programme on 29th September 2022, at 2.00 pm, in the college seminar hall.

The lecture aimed to educate the audience about the importance of maintaining a healthy heart and the risk factors associated with cardiovascular diseases. The speaker, an expert in the field, discussed various preventive measures that can be taken to reduce the risk of heart diseases and the importance of regular exercise and a balanced diet in maintaining good heart health. The event saw enthusiastic participation from students, faculty, and members of the general public. The audience actively engaged in the discussion and raised relevant questions about cardiovascular health.

- **WORLD AIDS DAY CELEBRATION**

Science Club and The Department of Biochemistry & Industrial Microbiology have jointly organised an online webinar on ' World Aids Day'

Date of the Event: **1/12/2022**

Mode: Google meet

Gmeetlink- https://meet.google.com/tcc-vzyc-qbb

Resource Person- Dr. Ganga.G, Asst.Prof, Sree Ayyappa College

No. of Participants: Students- 39, Faculty-5

OBJECTIVE:

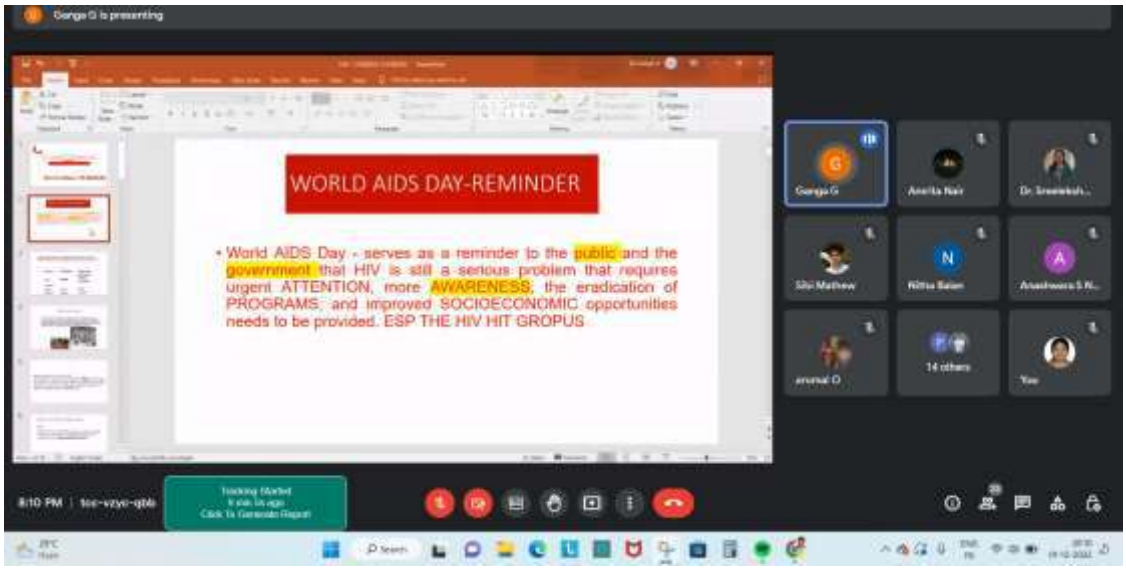

To spread awareness about the status of the pandemic and encourage progress in HIV/AIDS prevention, treatment and care around the world.

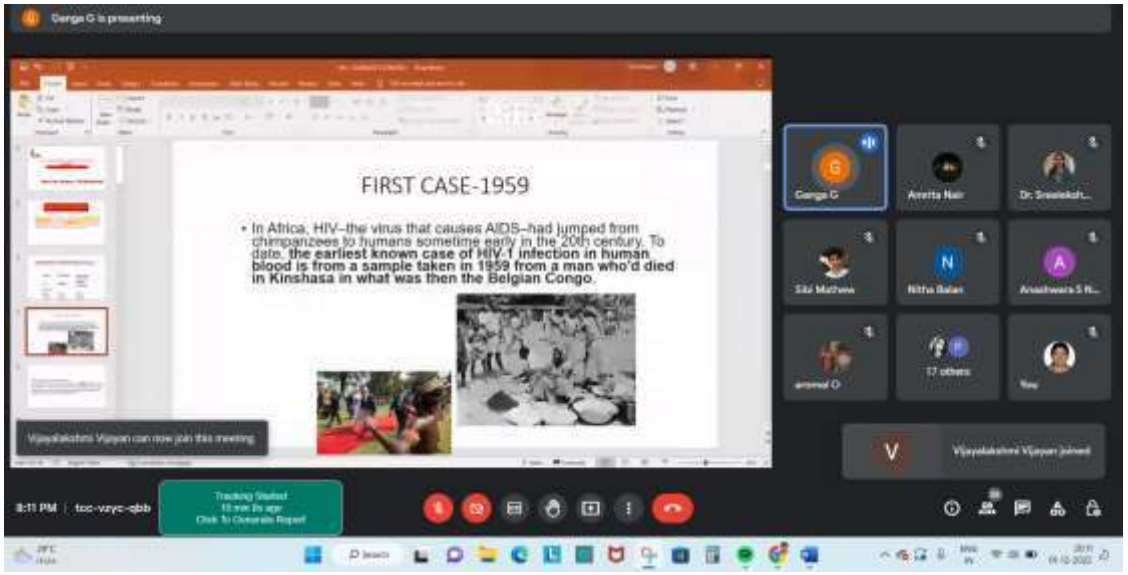

World AIDS Day celebration takes place on 1 December each year. It's an opportunity for people worldwide to unite in the fight against HIV, to show support for people living with HIV. Founded in 1988, World AIDS Day was the first ever global health day. As part of the World Aids Day Celebration, Science club and Department of Biochemistry & Industrial Microbiology conducted an awareness programme on December 1st 2022 . The theme for the 2022 World Aids Day was **'Equalise'.** The day is an opportunity to spread awareness about the status of the pandemic and encourage progress in HIV/AIDS

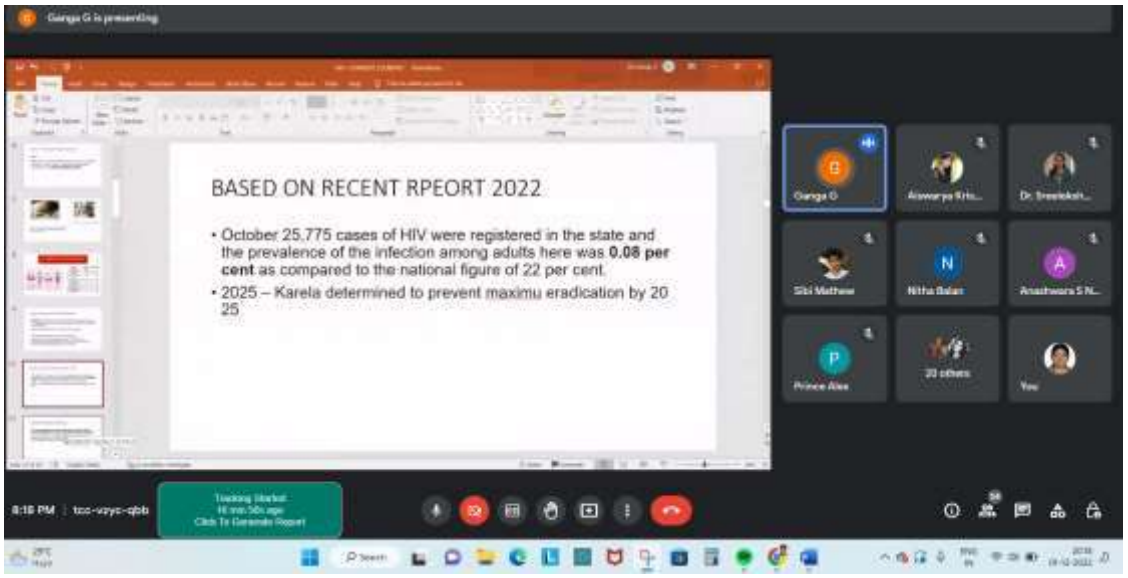

prevention, treatment and care around the world. It has become one of the most widely recognized international health days and a key opportunity to raise awareness. The science club students and staff pinned Red Ribbons. An awareness online seminar on the theme of AIDS was conducted for students in body's disease fighting ability and the specified themes were delivered to students. Dr. Ganga G familiarised the young learners about AIDS – its causes, impact and evils. "The immune system of the person suffering from the disease gets damaged and also reduces the disease fighting ability of the body. There is no cure for HIV infection. However, with increasing access to effective HIV prevention, diagnosis, treatment and care, HIV infection has become a manageable chronic health condition, enabling people living with HIV to lead long and healthy lives. HIV can be transmitted via-the exchange of a variety of body fluids from infected people such as blood, breast milk, semen and vaginal secretions. The preventive measures against HIV AIDS include, using protection during sexual intercourse, avoid sharing needles, blades etc. with other people and building good body immunity".

FIRST CASE-1959
• In Africa, HIV–the virus that causes AIDS–had jumped from chimpanzees to humans sometime early in the 20th century. To date, the earliest known case of HIV-1 infection in human blood is from a sample taken in 1959 from a man who'd died in Kinshasa in what was then the Belgian Congo.

- **SPACE DAY CELEBRATION**

The Science Club & IQAC in association with ISRO jointly organised a Space day as part of science club activities via online mode using Google Meet.. Mr. Muhammad Suhail, scientist,VSSC was the resource person for the event, and the topic of the talk was "World Space Week Celebration on 10th October 2022 at 6.00 pm."The talk was attended by a total of 35 students.He also encouraged active participation from the students, answering their questions and clarifying any doubts they had.

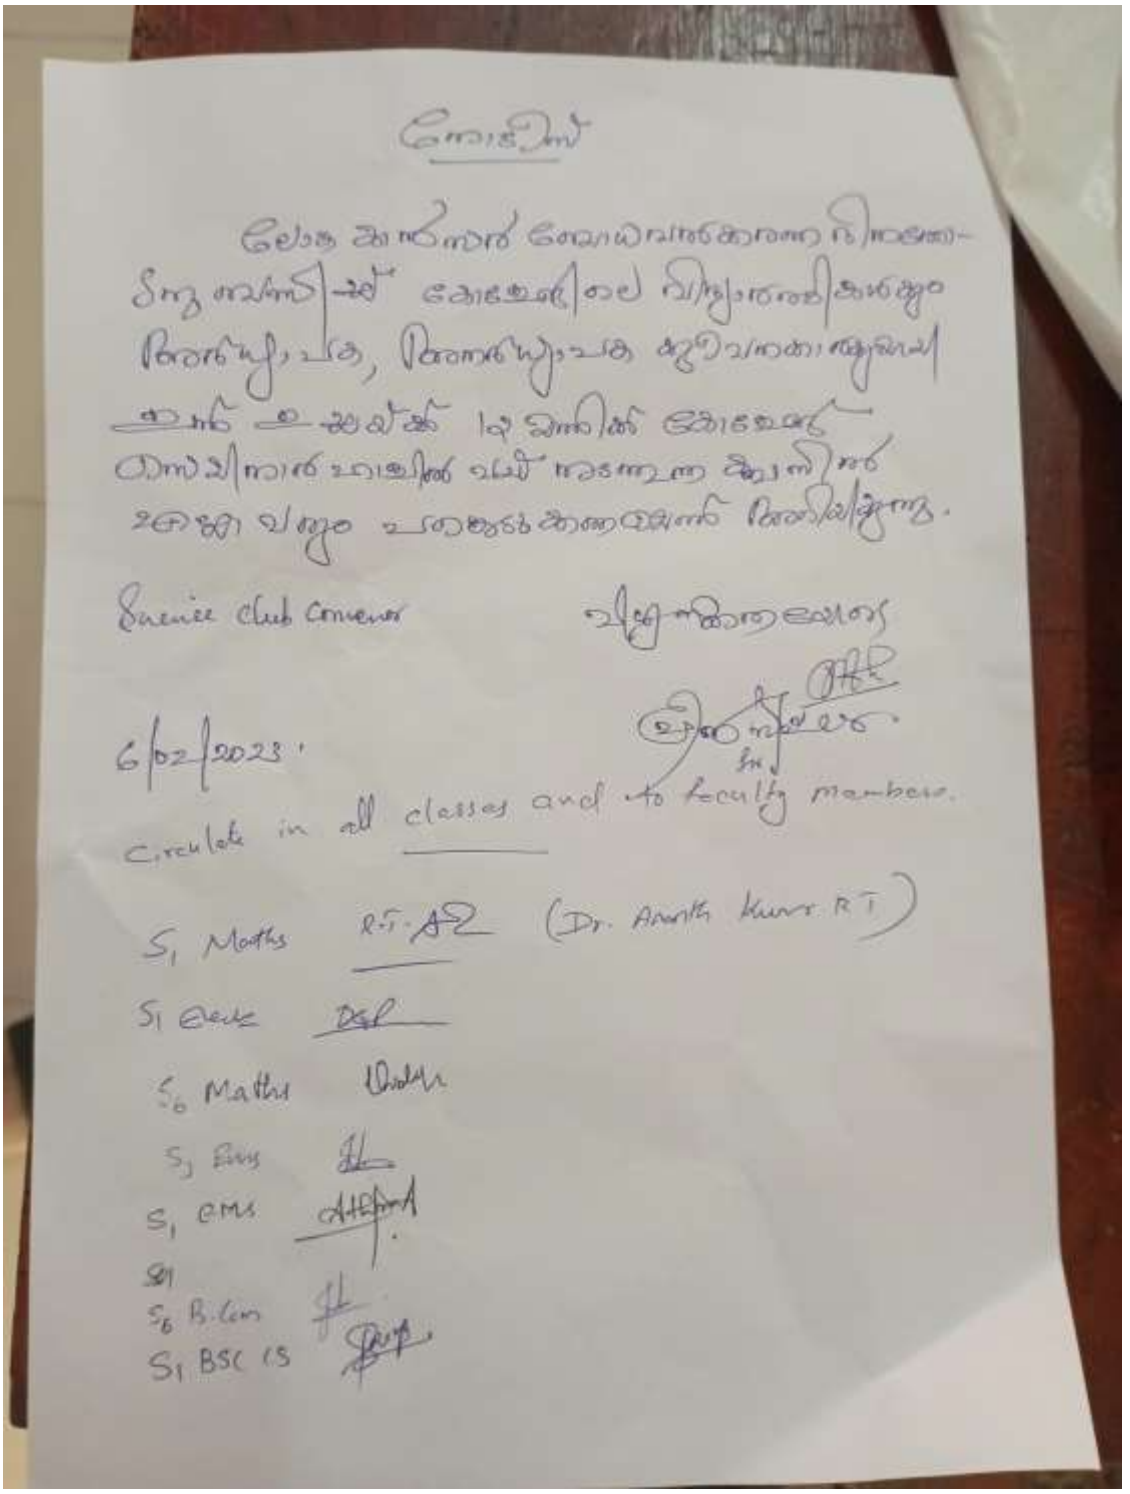

World Space Week Celebration Organised by Science Club, IQAC of SREE AYYAPPA COLLEGE & ISRO (Responses)

- **Awareness Talk on World Cancer Day on 6th February 2023**

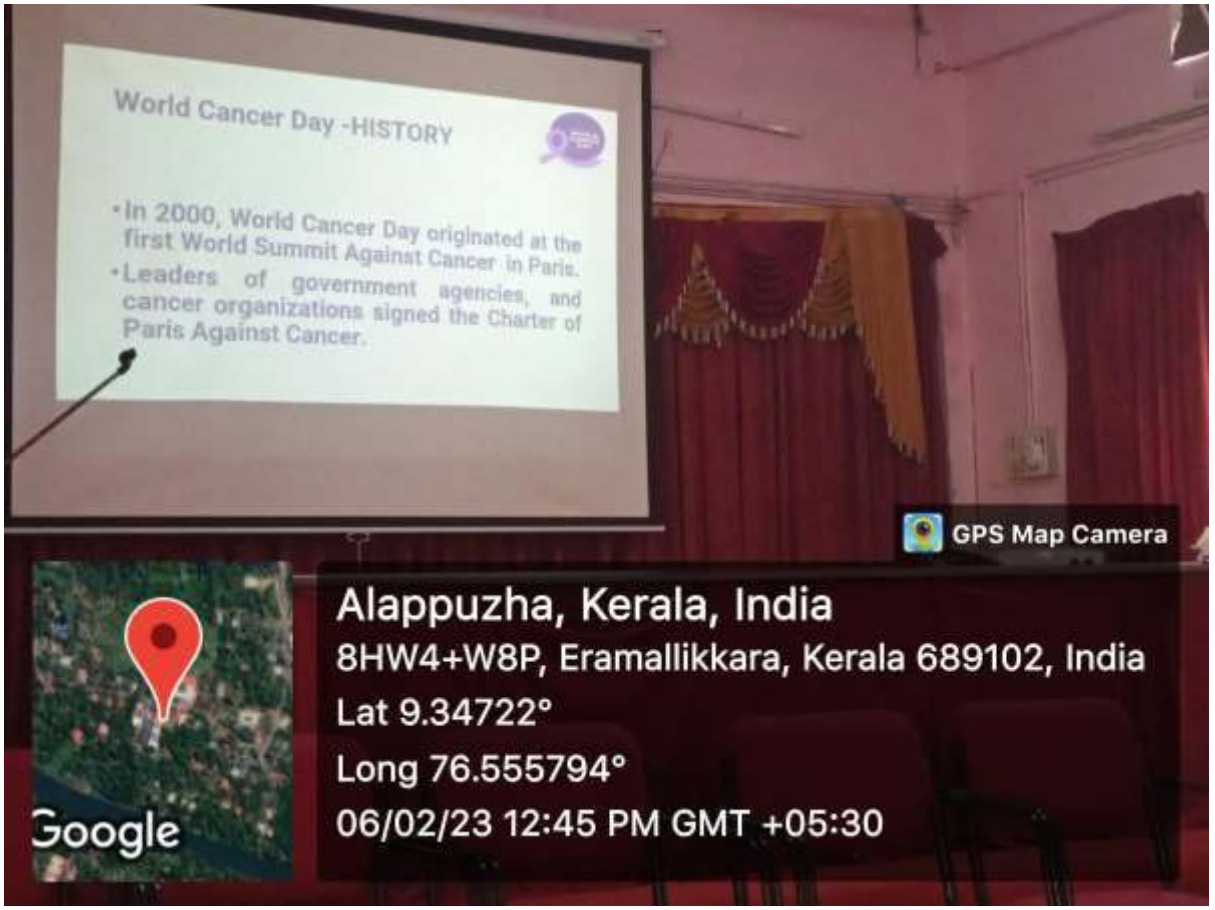

Organized by Science Club, College Union and Department of Bio-Chemistry and Industrial Micro Biology on 6th February 2023.

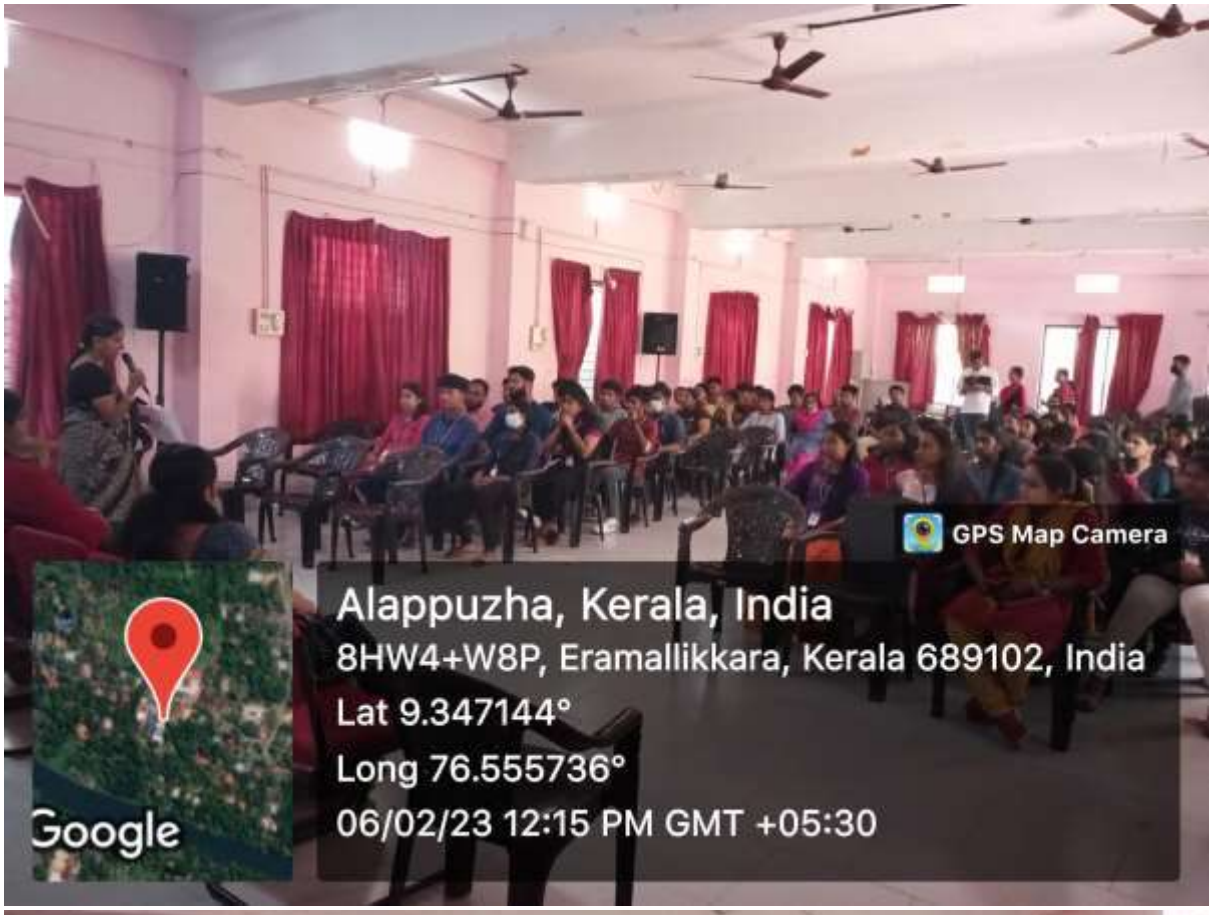

An awareness talk on World Cancer Day organised by Science Club, College Union and Department of Biochemistry and Industrial Microbiology on 6th February 2023 at Seminar Hall.Mrs. Adhithya Sajeev, S1 Maths student delivered a welcome speech. The programme was inaugurated by Prof. Shobha P K, IQAC Convenor.

Dr. Nitha B, HoD, Department of BC and IMB, Resource Person, talk about an Awareness ,Symptoms and Prevention of Cancer.

Dr. Rejiya C S, Assistant Professor, Department of BC and IMB, talk about World Cancer Day 2023- Theme, “Close The Care Gap" and discussed the significance of the theme ,finally she presented YouTube videos regarding this. Vote of thanks delivered by Prija P, First year Bcom Student.Total of 79 students and 16 Teaching and nonteaching staffs were attended the program.

- Publish a notice on H3N2 INFLUENZA on Notice Board

SREE AYYAPPA COLLEGE, ERAMALLIKKARA

SCIENCE CLUB

What's H3N2 influenza?

H3N2 is a variant of the influenza virus, more severe, particularly among at-risk groups such as older adults and younger children.

Symptoms

The symptoms of H3N2 include **cold, cough and throat pain.**

- Air pollution makes the H3N2 strain worse. It is easily contagious
- According to ICMR researchers, feverish upper respiratory infections are a common occurrence in
- **Coughing, nausea, vomiting, sore throat, body aches, and diarrhoea** are additional typical symptoms.

How serious it is?

Of the hospitalised SARI patients down with influenza A H3N2, about 92% reported fever, 86% cough, 27% breathlessness and 16% wheezing.

Another 16% had clinical signs of pneumonia and 6% seizures.

Ten per cent of SARI patients, having H3N2, needed oxygen support while 7% required ICU care.

How is it different from the common flu?

Of the four — A, B, C and D — influenza viruses A and B cause the seasonal epidemics of flu, a respiratory illness, that occur every year.

Some influenza A subtypes — H1N1 (or, swine flu virus) and H3N2 — can cause more severe illnesses.

At risk A survey published in Nature shows that H3N2 virus infections produce non-neutralising H3N2 antibodies, particularly among middle-aged. The Indian Medical Association says people over 50 and below 15 are more vulnerable, and air pollution could be a precipitating factor.

IMA issues advisory: The IMA has issued a note of caution against misuse of antibiotics amid a spike in flu cases in India. It has said many people are taking antibiotics on their own to manage fever and coughs which can be due to the seasonal influenza.

To
Notice Board

It is made available through the Public Health System free of cost. The government has allowed the sale of Oseltamivir under Schedule H1 of Drug and Cosmetic Act in February 2017 for wider accessibility and availability.

Do's

- If symptomatic Wash hands with soap and water
- Wear masks and avoid crowded places
- Cover mouth and nose while sneezing and coughing
- Take plenty of fluids
- Avoid touching eyes and nose
- Take Paracetamol for fever and body aches

Dont's

- Shake hands or use other contact greetings
- Take antibiotics or other medicine without consulting a doctor
- Spit in public
- Eat together sitting close to others

Drugs

- Oseltamivir is the drug recommended by WHO. It is made available through the Public Health System free of cost.
- The government has allowed the sale of Oseltamivir under Schedule H1 of Drug and Cosmetic Act in February 2017 for wider accessibility and availability.
