L^AT_EX - A Document Preparation Software in Mathematics**Instructional hours- 35**

L^AT_EX is a Science Typesetting Software. The aim of introducing L^AT_EX Software is to enable students to typeset the project report which is a compulsory requirement for finishing their undergraduate programme successfully.

L^AT_EX for Preparing a Project Report :

Graphical User Interface (GUI)/ Editor like Kile or TeXstudio should be used for providing training to the students. The main topics are the following:

Typesetting a simple article and compiling it;

How spaces are treated in the document;

Document layout : various options to be included in the documentclass command, page styles, splitting files into smaller files, breaking line and page, using boxes (like, mbox) to keep text unbroken across lines, dividing document in to parts like frontmatter, mainmatter, backmatter, chapters, sections, etc., cross referencing with and without page number, adding footnotes;

Emphasizing words with \emph, \texttt, \textsl, \textit, \underline etc.

Basic environments like enumerate, itemize, description, flushleft, flushright, center, quote, quotation

Controlling enumeration via the enumerate package.

Tables : Preparing a table and floating it, the longtable environment;

Typesetting Mathematics : Basic symbols, equations, operators, the equation environment and reference to it, the displaymath environment, exponents, arrows, basic functions, limits, fractions, spacing in the Mathematics environments, matrices, aligning various objects, multi-equation environments, suppressing numbering for one or more equations, handling long equations, phantoms, using normal text in math mode, controlling font size, typesetting theorems, definitions, lemmas, etc., making text bold in math mode, inserting symbols and environments (array, pmatrix etc.) using the support of GUIs;

Figures : Including JPG, PNG graphics with graphicx package, controlling width, height etc., floating figures, adding captions, the wrapfig package;

Adding references/bibliography and citing them, using the package hyperref to add and control hypertext links, creating presentations with pdfscreen, creating new commands;

Fonts : changing font size, various fonts, math fonts,

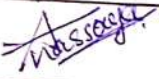

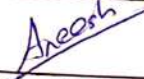

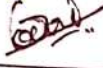

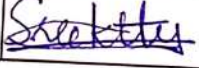

Spacing : changing line spacing, controlling horizontal, vertical spacing, controlling the margins using the geometry package, full-page package

Preparing a dummy project with title page, acknowledgement, certificates, table of contents (using \table of contents), list of tables, table of figures, chapters, sections, bibliography (using the bibliography environment).
